FIMER

Solar inverter
UNO-DM-6.0-TL-PLUS

The UNO-DM-6.0-PLUS single-phase inverter is an optimal solution for residential installations.

6 kW

High power density
The design wraps FIMER's quality and engineering into a lightweight and compact package thanks to technological choices optimized for installations with different orientation.

The inverter allows high performance in a minimum space and has a dual Maximum Power Point Tracker (2 MPPT).

Easy to install, fast to commission
The featured easy commissioning routine removes the need for a long configuration process, resulting in lower installation time and costs.
Improved user experience thanks to a build in User Interface (UI), which enables access to features such as advanced inverter configuration settings, dynamic feed-in control and load manager, from any WLAN enabled devices (smartphone, tablet or PC).

Smart capabilities
The embedded logging capabilities and direct transferring of the data to Internet (via Ethernet or WLAN) allow customers to enjoy the whole Aurora Vision remote monitoring experience.
The advanced communication interfaces (WLAN, Ethernet, RS-485) combined with an efficient Modbus (RTU/TCP)

communication protocol, Sunspec compliant, allow the inverter to be easily integrated within any smart environment and with third party monitoring and control systems.
A complete set of control functions with the embedded efficient algorithm, enabling dynamic control of the feed-in (i.e. zero injection), make the inverter suitable for worldwide applications in compliance with regulatory norms and needs of the utilities.
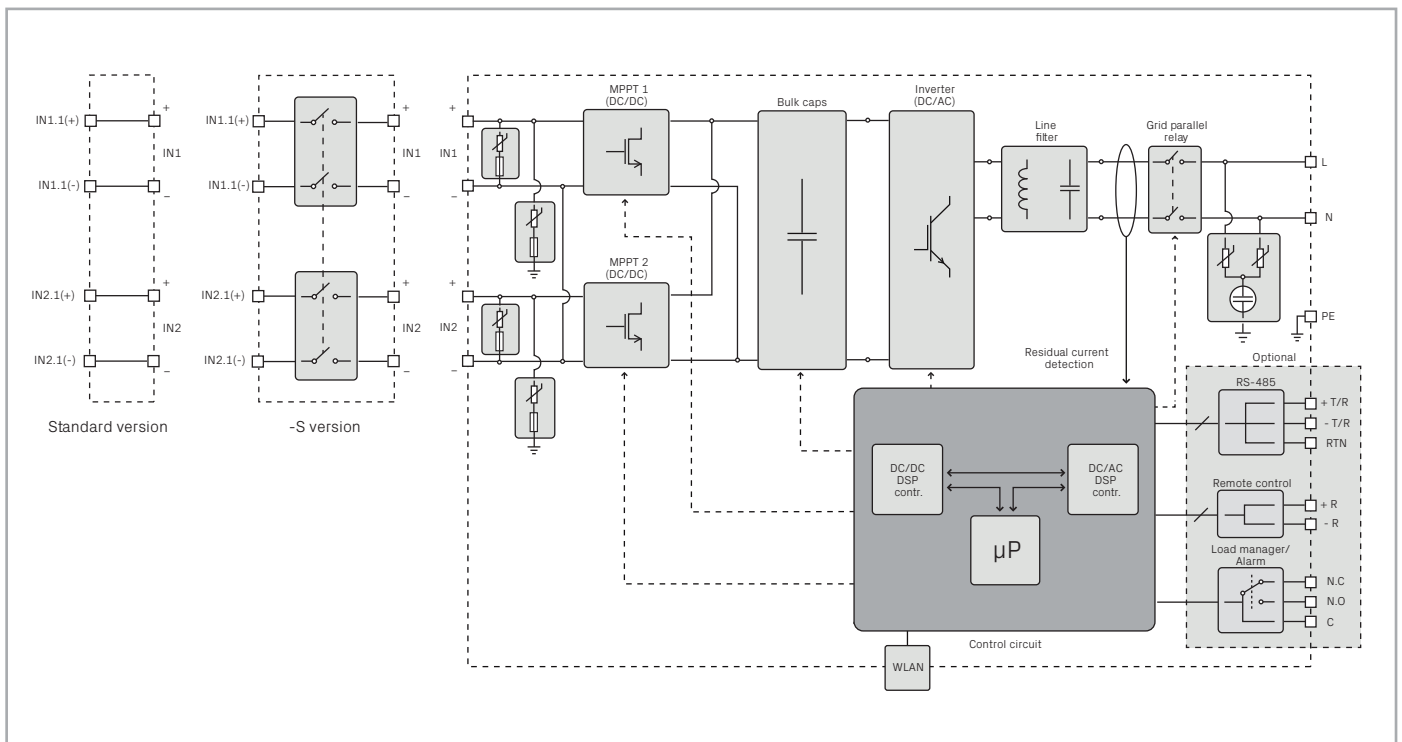

Energy Viewer
This new tool allows residential customers to remotely monitor the performance of their own solar plant and provides all information necessary to increase energy self-reliance and self-sufficiency.

Highlights
• Wireless access to the embedded Web User Interface
• Easy commissioning capability
• Future-proof with embedded connectivity for smart building and smart grid integration
• Dynamic feed-in control (for instance "zero injection")
• Remote firmware upgrade for inverter and components
• Modbus TCP/RTU Sunspec compliant
• Remote monitoring via Aurora Vision cloud
